

THE DEMOCRATIC REPUBLIC OF CONGO

Topic : RUSSIA AND UKRAIN CRISIS

The DR Congo, is a member of the United Nations since 1960, participate in discussions on the role and mission of the UN and thus influence the way in which its priorities are defined and its programs implemented. And according to the topic the Russia and Ukraine, on 3 March 2022 we voted for the cease-fire and demands that the Russia immediately stop using force against Ukraine.

The DR Congo, in the same way, has been victim of aggression with many Rebels groups M23, ADF etc. coming from his neighboring countries. By this experience, we maintain the position of Ukraine. The DR Congo is among countries victim of inflation, Rising of prices for energy and certain raw materials slowing economic growth and turmoil in global Financial markets. The international relations weaken by the war.

The DR Congo, for the conclusion among other countries is available to pass by negotiation of the countries to maintain the international diplomatie et avoid more crisis that we are victims economically etc. The général assembly has never work for the division of people the Russia being part of the five permanent members of UN Concil Security has to negotiate with the Ukraine to find a harmony with It.
